KaiserComm Inc. Announces Entry into Commercial Security Market
Leveraging 20 Years in the Telecom Industry Opens New Business Opportunities Nationwide

MINNEAPOLIS - KAISERComm Inc, a leading provider of telecommunications systems and solutions nationwide announces their entry into the commercial security market. KAISERComm provided Multi-Pack of Chicago the one-stop solution they were looking for in their new location located in Mount Prospect, Illinois. "We were initially asked to propose a new telephone system but after hearing the customers' needs we suggested taking care of their security system and they were totally on board", explained Steve Wexler, CEO of KAISERComm.

KAISERComm just recently added AIPHONE, a premise based security system, including camera, key card access and a visual entry system to their product portfolio. This addition allowed KAISERComm to propose a total turn-key operation from sale to installation. "We utilized KAISERComm to supply us with a state of the art telecommunications system. By adding the security system it allowed us to deal with only one vendor instead of two or more. We were on a tight schedule to get moved in to our new facility. With the help of KAISERComm, we met all of our deadlines, and are thrilled with our new technology solutions", stated Jim Connelly, General Manager, Multi-Pack.

Becoming the Best of the Best

KAISERComm is a certified SonicMG member and pledges to provide the Five Xs: Experienced People, Excellent Service, Expert Advice, Extraordinary Technology and Exceptional Value. This is the commitment upon which KAISERComm has built its 20 years of success in the telecom industry. KAISERComm installs and services business telephone and security solutions from the industries leading manufactures. Because these services are offered both remotely and on-site, KAISERComm manages the problem to resolution to ensure maximized system availability.
